

Barbara Simonič

REPUBLIC OF SLOVENIA
MINISTRY OF THE ENVIRONMENT AND SPATIAL PLANNING

Regional background

I FEEL SLOVENIA

Great climate variety: the Alps, Adriatic sea, Panonian valley

Threats/Impacts:

- Extreme weather events: floods, drought, sleet, forest fires, ...
- Gradual impacts of climate change: longer growing season, higher summer temperatures, water scarcity, ...

Adaptation Processes:

- Different methods used under different circumstances; from wide stakeholders consultations to closed government officials meetings
- Different levels of participation
- Most vocal vs. most relevant, the question of balancing views
- Various worldviews, values and levels of experience to be taken onboard

CLIMATE TRENDS AND SCENARIOS

Slovenia observed 1,7°C warming between 1961-2011
